12 October 2026

**Recommendation Letter**

To whom it may concern,

I am pleased to recommend Sherif Ibrahim Mourice Ibrahim, who was employed at FigPii from 4 November 2024 to 23 September 2026. Sherif joined the company as a Front-End Developer Intern and subsequently advanced to a full-time Frontend Developer. This progression reflected the increasing scope of his responsibilities and his ability to take ownership of production development work.

Throughout his employment, Sherif contributed to the development and implementation of A/B testing variations using JavaScript and CSS, supporting experimentation across more than 20 client e-commerce websites. His responsibilities included building and maintaining front-end features, working on custom WordPress and Shopify websites, and developing responsive interfaces for client campaigns. He also helped optimize website performance and cross-browser compatibility to support consistent user experiences.

Sherif brought valuable technical skills in front-end development, including JavaScript, modern CSS practices, responsive design, and the practical implementation of UI/UX improvements. Working closely with CRO specialists, his reporting manager, and cross-functional colleagues, he translated design and experimentation requirements into functional website changes. His work supported the delivery of client testing initiatives intended to improve user engagement and conversion performance.

In carrying out his responsibilities, Sherif showed initiative, attention to implementation detail, and a willingness to take responsibility for assigned deliverables. His ability to collaborate across disciplines and contribute to both experiment development and ongoing website enhancements made him a valued member of the team. We appreciate his professional growth, technical contributions, and service to FigPii, and are pleased to recommend him for future front-end development opportunities. We wish him continued success in his career.
