SHERIF IBRAHIM

Front-End Web Developer

Cairo, Egypt | +20 127 354-6616 | sim_igy@yahoo.com
github.com/Simigy | linkedin.com/in/simigy

PROFESSIONAL SUMMARY

Front-End React Developer with 2+ years of experience building responsive, user-focused web applications using JavaScript, React.js, TypeScript, Redux, and SCSS. Skilled in developing reusable UI components, implementing A/B testing variations, integrating REST APIs, and customizing WordPress sites. Proven track record of improving development efficiency through custom SCSS tooling and building internal UI libraries. Strong collaborator skilled at translating client requirements into clean, maintainable, production-ready code.

SKILLS

Languages & Core: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, C++, OOP

Frameworks & Libraries: React.js, Redux, jQuery, Bootstrap, Tailwind CSS, Material UI, Shopify

Tools & Practices: Git, REST APIs, AJAX, Responsive Design, Cross-Browser Compatibility, A/B Testing, WordPress

Languages Spoken: Arabic (Native), English (Professional)

PROFESSIONAL EXPERIENCE

Front-End Developer — Invesp
Aug 2026 – Present

Remote

- Building and maintaining responsive, high-performance web interfaces for client campaigns using JavaScript, React.js, and modern CSS.
- Collaborating with the CRO team to implement UI/UX improvements that enhance user engagement and conversion rates.
- Optimizing front-end performance and ensuring cross-browser compatibility across all deliverables.

Front-End Developer — FigPii
Jan 2026 – Aug 2026

Remote

- Promoted from Front-End Developer Intern to full-time Front-End Developer after demonstrating strong ownership of production features.
- Build and implement A/B test variations (JavaScript/CSS) and set up experiments on FigPii's own testing platform across 20+ client e-commerce sites.
- Build and maintain front-end features for FigPii's product using JavaScript, React, and modern CSS practices, including custom WordPress site development.
- Collaborate with the reporting manager and cross-functional team members to ship reliable, well-tested UI changes.

Front-End Developer Intern — FigPii
Nov 2024 – Jan 2026

Remote

- Contributed to front-end development tasks while ramping up on the team's codebase, tooling, and workflows.
- Gained hands-on experience with production-grade React development and team code review practices.

Front-End Developer — Freelance
Jul 2023 – Nov 2024

Remote

- Built and maintained dynamic, responsive websites for clients using JavaScript, HTML5, CSS3, React, jQuery, and Redux.
- Worked directly with clients to gather requirements, define solutions, and deliver tailored front-end implementations.
- Developed custom SCSS mixins and functions that improved styling efficiency, cutting average time spent on styling tasks by 15%.
- Built a custom UI library that increased developer productivity and component reuse across projects.
- Used Tailwind CSS, Bootstrap, React Query, and Material UI to accelerate development and improve maintainability.

PORTFOLIO

Freshcart | GitHub Repo — Full-featured e-commerce store with product browsing, cart management, and checkout flow. Built with React, TypeScript, Context API, and REST APIs.

Yummy | GitHub Repo — Recipe discovery platform allowing users to search meals by name, category, or ingredient. Built with JavaScript, REST APIs, Regex, and Bootstrap.

Weather App | GitHub Repo — Real-time location-based weather dashboard displaying temperature, humidity, and 5-day forecasts. Built with JavaScript and public weather APIs.

Game Over | GitHub Repo — Interactive browser-based trivia game with dynamic API data fetching and score tracking. Built with JavaScript and REST APIs.
